

RADIATION SAFETY TRAINING

NSW EPA S30 LICENCE

COURSE OVERVIEW:

Hunter Geotechnical Services is offering a 1-day, EPA-approved Radiation Safety Training for the NSW EPA S30 Licence. This course provides essential training for the safe use of radioactive substances in moisture and density determination, in compliance with regulatory standards.

WHAT YOU'LL LEARN:

The course includes radiation safety training across a variety of topics:

- The Scientific Background
- Units of Measurement
- Biological Effects
- Radiation Protection Standards
- The ALARA Principle
- Background Radiation
- External Radiation Control
- Safe Storage, Use, and Transport

DETAILS:

- Duration: 1 day (6.5 to 7 hours)
- Location: Hunter Geotechnical Services facility or on-site for a minimum of 2 participants
- Lunch and all course materials are included
- Certification: Upon successful completion, participants receive a Certificate of Attainment
- Refresher Course: 2-hour refresher courses are also available every two years

PRICING:

- Minimum of two participants per session, maximum of six.
- \$900 + GST per person for the first two participants.
- \$800 + GST per person for each additional participant (up to six).

Training can be conducted at our Thornton office or on-site at your location. If held on-site, additional travel and accommodation costs may apply.

REFRESHER COURSE AVAILABLE

Please note that some authorities require a refresher course every two years. We offer a 2-hour refresher course to help keep your certification current and ensure continued compliance with EPA standards.

Contact us for pricing.

TRAINER:

Scott Picton, with 16 years of experience in soil and moisture density gauges and 8 years as an NSW EPA Cert IV trainer, will guide you through the course.
